✦ Rebecca Havens Gore

Summary

Design Systems Lead • Principal Product Designer • UX & AI Experience Architect with 10+ years of experience designing scalable design systems, platform UX frameworks, AI experience standards, and high-impact enterprise products. Proven success unifying multi-product experiences, accelerating engineering velocity, and mentoring teams into design maturity at Rapid7, AlphaWave, and Kronologic. I design and scale the systems that make enterprise products coherent, usable, and trustworthy. My work unifies design and engineering, shapes platform-wide experiences, and brings responsibility and clarity to AI UX.

Professional Experience

Staff User Experience Designer - Portfolio Experience Enablement

Rapid7 | January 2021 – Present

- Architected the Rapid7 Design System (RDS) and led MUI migration, improving UI implementation speed by 40% and achieving 80% platform adoption with 100% WCAG 2.2 AA compliance
- Designed the Unified Platform Experience, standardizing tables, filters, batch actions, and navigation across six products (+50% UX consistency, +28% task success)
- Re-designed the Data Visualization System (DVS) powering dashboards and reporting across enterprise security products, reducing design time by 60% and increasing engagement by 30%
- Led the AI Experience Standard with responsible AI principles, UX patterns, trust and explainability models, and AI permissions framework
- Created the Design Forum and UX Standards governance process, improving accessibility compliance by 40% and reducing design drift
- Mentored designers, built onboarding curriculum, and launched design education and enablement programs

Lead UX Designer & Design System Architect (Contract)

Alphawave | 2020-2021

- Established AlphaWave's UX strategy and visual foundation from the ground up
- Created the AlphaWave Design System with component architecture, styling, and comprehensive documentation
- Designed dashboards, asset intelligence, risk scoring, scanning workflows, and reporting features
- Led user research and prototyping cycles that shaped product-market fit
- Contributed significantly to AlphaWave's highly positive SC Labs review, which praised the product's design clarity and modern UX

Lead UX Designer & Design System Architect (Contract)

Kronologic | 2020-2021

- Introduced Ant Design (AntD) and rebuilt Kronologic's UI foundation on a scalable design system
- Led a complete redesign of product navigation, information architecture, dashboard structure, and interaction design
- Standardized UI patterns and modernized all core product surfaces for consistency and usability
- Improved workflow clarity, reduced engineering rework, and raised product credibility for enterprise customers

Senior UX Designer / UX Designer II

Rapid7 | 2016-2020

- Led UX design for Data Visualization Service (DVS) MVP and early platform dashboards, establishing foundational patterns for charting, card components, and insight-first experiences
- Designed the earliest unified dashboard experiences across InsightIDR, InsightVM, and InsightOps with focus on consistency, performance, and cognitive load reduction
- Defined cross-product filtering, querying, and drill-in interaction patterns that later informed the Unified Platform Experience work
- Designed platform workflows for asset inventory, scanning, risk assessment, and remediation — core to Rapid7's shared security posture model
- Contributed foundational design work that informed Rapid7's 2019–2020 Platform UX Vision, including Experience One, unified navigation, asset models, and early platform templates
- Built customer journey maps, service blueprints, object models, and task flows to align product and engineering teams on user needs

UX Designer

Bypass Mobile | 2013-2016

- Designed mobile and tablet-first POS (Point of Sale), ordering, and concessions experiences used in major stadiums, arenas, and event venues nationwide
- Led UX for high-speed transaction flows, inventory management, staff operations, and dashboard analytics
- Collaborated with engineering and product teams to modernize interaction models and optimize latency-sensitive workflows
- Designed new features for payments, QR ordering, and real-time sales tracking that served thousands of concurrent users
- Developed reusable components and early design system elements that reduced visual inconsistency and accelerated delivery

Education

MS In Information Studies (MSIS)

University Of Texas At Austin

2011-2013

Information Architecture, Retrieval, Visualization

MA In History

University Of Texas At Austin

2007-2011

Early Modern French & Spanish Atlantic, History of Medicine & Science

BA In Medieval & Renaissance Studies

Vassar College

2004-2007

English, History, Art History, Political Theory, Religious Studies

Key Accomplishments

- Built the R7 Design System (RDS) — Led creation, governance, and rollout across 6 products, achieving 80% platform coverage, 40% faster UI implementation, and WCAG 2.2 AA compliance
- Designed the Data Visualization System (DVS) — Platform-level framework reducing design time by 60%, increasing dashboard engagement by 30%, and unifying data views across all products
- Established Design Forum & UX Standards — Created governance framework improving design review speed by 35% and accessibility scores by 40%
- Led AI Experience Standard initiative — Defined 6 responsible AI principles and 12 reusable patterns for explainable, trustworthy AI-powered features
- Redesigned Unified Platform Experience — Consolidated fragmented patterns, achieving 50% increase in consistency and 28% improvement in task completion
- Mentored designers, built onboarding curriculum, and launched design education and enablement programs
